

Creating a VPN Account In Mac OS X 10.6x

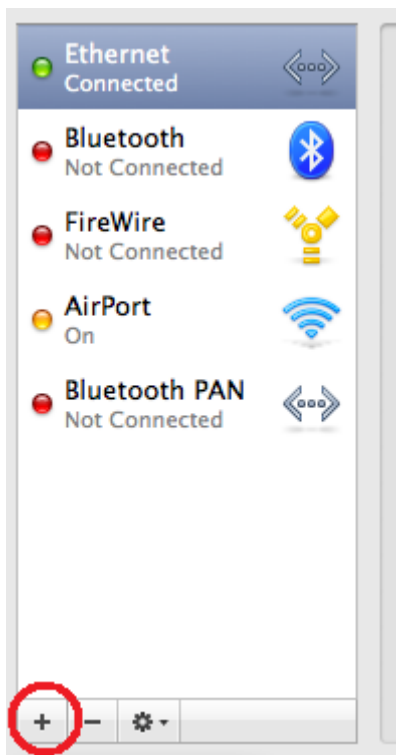

To create a Division of Finance VPN connection on your Macintosh computer, go to the Apple Menu & open the System Preferences.

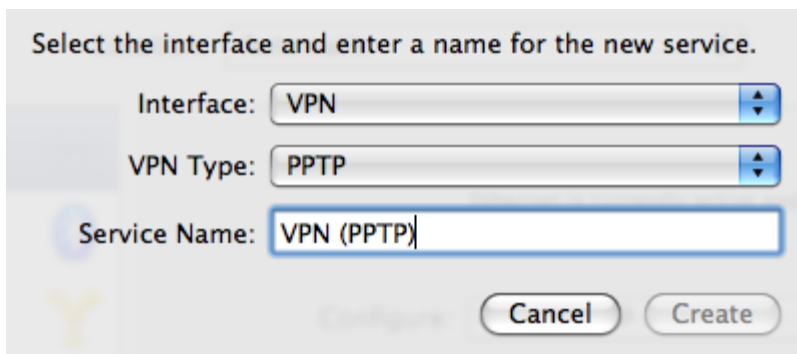

Then click on the Network System Preference to open it.

Once the Network System Preference opens, click on the + to create a new network protocol.

Then select the VPN interface, the PPTP VPN Type & then click create.

Finally, put in **vpn-server.tamu.edu** in the Server Address field & Account Name put in your **VPFN user name**. Put a check mark on the **Show VPN status in menu bar** to add an icon on your menu bar so you can easily connect to VPN in the future.
